## Documentation

https://docs.portainer.io/start/install-ce/server/docker/linux

https://docs.portainer.io/start/install-ce/server/docker/linux#docker-compose

## Running compose file

```
┌──[16:12:35]─[130]─[corporealsoul-server]─[~]
└─▪ curl -L https://downloads.portainer.io/ce-lts/portainer-compose.yaml -o portainer-compose.yaml

┌──[16:14:14]─[0]─[corporealsoul-server]─[~]
└─▪ docker compose -f portainer-compose.yaml up -d
```

# Configure the Firewall

```
┌──[16:16:28]─[0]─[corporealsoul-server]─[~]
└─▪ sudo firewall-cmd --permanent --add-port=9443/tcp

┌──[16:17:17]─[0]─[corporealsoul-server]─[~]
└─▪ sudo firewall-cmd --reload
```

## log into

https://192.168.56.4:9443

## Control

```
[corporealsoul@corporealsoul-server 12:00:07 Portainer]$ sudo docker restart portainer
```
