1. Companies Entering India This Year and Next Year

List global and domestic companies that are entering or expanding in India this year and expected to enter next year (e.g., new offices, major hiring announcements, investments, or expansions). Include the industry, cities they are planning to enter, and what roles/skills they are hiring for (especially tech/DevOps).

2. Best Places to Work This Year for a DevOps Engineer

Based on employer ratings, work-life balance, DevOps team size, and career growth prospects, list the top companies in India for DevOps Engineers this year. Include company culture, DevOps tooling environment, and common interview skills.

3. India's Fastest-Growing Companies

Find the current list of fastest-growing companies in India (growth defined by revenue, headcount, or market impact) for the latest year available. Highlight the industry, growth rate, and why they are considered fast growing.

4. "Big 4" Companies for DevOps (Service or Product)

Identify the top four leading companies known for DevOps leadership in India (product or service), describing why they are considered industry leaders, what DevOps practices/teams they have, and the typical tech stack used.

5. Top Product Companies

Provide a list of *top product companies in India* (product-first technology firms that build their own platforms/products) ranked by innovation, revenue, or developer demand. Include examples and core tech areas.

6. Top Service Companies

Provide a list of top IT service companies in India (consulting, enterprise transformation, outsourcing) that are strong in DevOps, cloud, or infrastructure automation roles. Highlight their key specialties and size.

7. Top Startups to Watch

List the top emerging startups in India that are hiring or showing rapid growth — especially in sectors like AI, cloud, fintech, SaaS, or DevOps-related tooling. Include reasons these startups are high-potential.

8. Top Companies in Bangalore (City-Wise)

Provide a curated list of top employers in Bangalore across tech, startup, and product orgs - especially those hiring for DevOps, cloud, or infrastructure roles. Include company size and specialties.

9. LinkedIn Top Companies (or Other Authentic Rankings)

Find the latest LinkedIn Top Companies list (or similar credible sources like Glassdoor, Fortune, Statista) for India by year, and categorize them by industry, size, and hiring strength, with a focus on tech and DevOps roles.

10. DevOps Market Trends in India

Summarize the latest DevOps industry trends in India, including emerging technologies, average salaries, in-demand tools (e.g., Kubernetes, Terraform), and hiring hotspots for 2026.

11. Skills in Highest Demand for DevOps Roles

List the top skills and certifications currently in highest demand for DevOps engineers in India, including cloud platforms, automation tools, and best practices.

12. Expected Salary Ranges for DevOps Roles in India

Provide updated salary ranges for DevOps Engineers in India (entry-level, mid, senior) across cities and company types (product vs service vs startup).

13. DevOps Interview Preparation Checklist

Create a DevOps interview preparation checklist including technical questions, behavioural competencies, and system design topics.

14. Companies Hiring Remote DevOps Roles

List major companies (global and India-based) that aggressively hire remote DevOps positions and summarize typical requirements.

15. DevOps Job Growth Forecast

Summarize projected DevOps job growth and trends in India over the next 2–3 years, including sectors driving demand (FinTech, SaaS, AI/ML, cloud).
